***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Nowak.

Nowak shows a body 6; deck 7; skirt 8; spout 11 having parallel long front and back walls (the orientation is relative, so the long sides can clearly be considered front and back), the walls are perpendicular to the deck; oblong orifice seen in Figure 4 having a peripheral surface; lid 14; sealing member as the bottom of 14 that engages the top of the orifice (and thus the outer surface of the orifice); and oblong wall 16 that is orthogonal to the plane of the deck.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Art Unit: 3754

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 2-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Nowak in view of Hartman, Sr.

Nowak has been discussed above, but lacks the details of the curved interior surfaces between the deck and orifice. Hartman, Sr. shows a continuously curved interior surface with the lower end substantially parallel to the container opening plane as seen in Figure 2 and the upper end directed toward the orifice as seen in Figure 3. The geometric function is parabolic if considering one side and hyperbolic when both are taken together as seen in Figure 2. The front and back surfaces adjacent the orifice are tangential to planes passing through the orifice as seen in Figure 2. It would have been obvious to one of ordinary skill in the art to provide the curved features of Hartman, Sr. on the device of Nowak as the curved surfaces would better promote the flow of material toward the orifice as material is less likely to be trapped or blocked (because of a surface perpendicular to the flow like that of Nowak).

### ***Double Patenting***

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double

Art Unit: 3754

patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

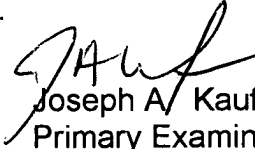

7. Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 6,688,501. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the instant application is merely a slightly broader recitation of the patented claim.
